Design Brief

PROJECT

CYS Chinese Website

PHASE

Sitemap → Lofi → Hifi

DATE

2 August 2026

STATUS

For client approval

A positioning site, 不是销售漏斗

The Chinese site is the first step of the **CYS China Strategic Partnership Programme** and the starting point of a broader digital ecosystem platform.

It exists to do two things: open the Chinese market, and build a Chinese business community around a forum where members share resources and find each other.

"A trusted payment bridge connecting China and Southeast Asia."

连接中国与东南亚的可信支付桥梁，启迪跨境商业新可能。

IT IS	IT IS NOT
— An institutional credibility statement — A community front door — Bilingual, CN-first — Visibly international	— A product sales page — A lead-generation funnel — A rate-comparison tool — A consumer remittance app

Financial marketing is regulated in China. Restraint here is a compliance requirement, not a stylistic preference.

02 — WHO IT SPEAKS TO

Five audiences, 一个共同语言

Four rules that settle arguments

PRINCIPLE 01

Credibility over persuasion

Forty-five years, an MAS licence, USD 2.2bn a year. The facts do the selling. No urgency devices, no countdown, no "get started now". Whitespace and precision read as institutional; density and hard CTAs read as retail.

PRINCIPLE 02

Chinese first, not translated

The CN layout is the design; EN is the mirror. Line length, leading, and letter-spacing are set for Chinese and adapted for English — never the reverse. If a layout only works in one language, it is not finished.

PRINCIPLE 03

Connection is the visual idea

The client asked for a better expression of *global* and *connection* than stock earth imagery. Bridges, corridors, trade routes, threads between points — the corridor is the story, not the planet.

PRINCIPLE 04

The community is visible

The boss's priority is the community. Forum posts appear on the homepage and link through. A visitor should see people using this within the first screen and a half — not discover a forum buried in the nav.

DECISION NEEDED — THIS UNBLOCKS EVERYTHING

04 — COLOUR, RECOMMENDED DIRECTION

Corridor 走廊

Built from the client's own mockups: a deep navy night sky, institutional blue structure, warm paper ground, and the CYS green used sparingly as the signal colour. Warm paper is what keeps it from reading as another cold fintech site.

Ink
#0A1628
Hero base, primary text on paper

Navy
#16305C
Section blocks, footer, mega menu

Azure
#2E6FB7
Links, interactive, eyebrow labels

Jade
#6DA544
CYS mark green. Accent only — never a background

Cream
#F5F1E8
Page ground

Sand
#E3DCCB
Dividers, card borders, subtle fills

Slate
#5A6B85
Body copy, secondary text

Paper
#FFFFFF
Cards lifted off the cream ground

If Corridor isn't right

Institutional 稳健

Cool greys replace the cream. Reads more like a bank and less like an editorial brand — safest with conservative FI partners, but gives up the warmth that makes the site feel like a community rather than a counterparty.

Bridge 桥梁

Adds a terracotta drawn from Chinese architectural red, used for the corridor and milestone sections. Warmest and most distinctive of the three — but red carries weight in this market and needs a deliberate hand.

Our recommendation is Corridor. It is closest to what CYS already mocked up, so it needs the least internal selling, and the warm ground differentiates without taking a risk on red.

One system, two writing systems

DISPLAY — HEADLINES

连接中国与东南亚的可信支付桥梁 A Trusted Payment Bridge

Noto Serif SC + Latin serif companion · 600 · CN tracking +0.06em

BODY — RUNNING TEXT

星威环球成立于1981年，总部设于新加坡。

Founded in 1981, headquartered in Singapore.

CN system stack · EN self-hosted sans · 400

The constraint that shapes everything

A full CJK webfont is 3–10 MB — unusable, especially for visitors on slow connections into China. So: **CN body runs on the system stack** (PingFang SC → Microsoft YaHei → Noto Sans SC), and any display face is **subset to the ~500 characters** actually used in headings.

Same component, different metrics

Chinese needs looser leading and wider tracking than English at the same size; English needs tighter tracking and a shorter measure. These are set as tokens scoped by language, not forked components.

:lang(zh) → leading 1.4 / tracking .08em

:lang(en) → leading 1.15 / tracking .02em

Express connection, 而非地球

The client's note on the homepage mockup, verbatim: "背景我想要表达是 *global and connection*。希望可以有更好的方式可以表达 *connection*" — they want a better way to express connection than the stock earth-from-space image. This is an open creative brief, not a locked direction.

REACH FOR

- Corridors, bridges, routes — the CN–SG corridor made literal
- Ports, containers, night freight — real trade, not abstract finance
- Singapore and Chinese cityscapes at dusk, held in one frame
- Real CYS people, office, and events wherever they exist

AVOID

- Earth-from-space and glowing network globes
- Handshake stock photography and generic boardrooms
- Floating currency symbols, rising arrows, candlestick charts
- Purple-to-blue gradients and default AI-generated aesthetics

Four partner cards on the corridor page and both partnership stories are currently placeholders. Real logos and named stories are outstanding from the client.

Nine sections, in this order

#	SECTION	CONTAINS	NOTE
1	Hero 首屏	Full-bleed imagery, positioning headline, 1981年启航于新加坡, forum CTA, search field	Needs new imagery direction
2	Values strip	包容 创新 启迪 — inclusion, innovation, inspiration	Sits over the hero
3	Currency ticker	SGD · CNY/CNH · USD · HKD · AUD · MYR · IDR · THB	Static / indicative
4	About 启航于1981	Company intro, link through to history	
5	Product & service	Three cards — cross-border payment · consulting · forum	
6	Corridor 中新合作走廊	40+ years stat, four partner cards, CTA	Placeholder logos
7	Customisation	Corporate and individual solution blocks	
8	Forum feed 华商论坛	Live posts, linked through to the forum	Client ask — not yet in the mockup
9	Footer	Four columns + FAQ, legal, feedback	

Both languages, every state

导航与语言

Header & mega menu

Translucent over hero, solid on interior pages. Four dropdown groups, CN/EN switcher, register & log in. Keyboard and screen-reader accessible.

卡片

Cards

Service, partner, use-case, and forum-post variants. One structure, four treatments.

表单

Forms

Enquiry with corporate/individual toggle, feedback quick-pick, and the forum post composer.

时间轴

Milestone timeline

1981 → 2011 → 2020 → 2025 → 2030. Needs to work on mobile without becoming a list.

论坛帖子

Forum post

Author, company, intent tag, markets, body. Plus the **pending review** state authors see.

页脚

Footer

Four columns. Note the footer and mega menu currently group pages differently — needs reconciling.

Every component ships in Chinese and English. A design that only resolves in one is not done.

Design inside these

TECHNICAL

Reachable from China

No Google Fonts, Maps, Analytics, reCAPTCHA, or YouTube. Every asset self-hosted and served from our own domain.

TECHNICAL

Weight budget

Connections into the mainland are slow even when they work. The hero is the single biggest risk — art-direct for a small file, don't retouch for one.

TECHNICAL

No CAPTCHA

Forms are protected by honeypot and rate limiting, so the design carries no puzzle widget anywhere.

EXPERIENCE

Accessible

AA contrast minimum. Jade on cream fails for body text — accent only. Every interactive element reachable by keyboard.

REGULATORY

No regulated claims

No rates, no returns, no "best price". Figures are historical facts, stated plainly and attributed.

STRUCTURAL

CMS-shaped

Copy is client-editable in both languages, so no layout may depend on a fixed character count.

Phase one is everything except the forum

DESIGN NOW — PHASE 1

Home	9 sections
About 关于我们	Intro · history · culture
Corridor 中新合作走廊	Partners · stories
Business 企业合作	FI · cross-border
Individual 个人用户	Three use cases
Contact 联系我们	Details · enquiry · feedback
Legal	FAQ · terms · privacy
Auth	Register · log in

DESIGN LATER — PHASE 2

星威华商论坛

The forum

Post list and detail, composer, profile, search and filters, moderation queue, and the author-facing pending / approved / rejected states.

But design the feed now

The homepage forum module ships in the Phase 1 demo, seeded with the four sample posts from the client's deck. Their stated priority is the community — a demo without any trace of it demonstrates the half they care less about.

Demo early October

WEEK	STAGE	OUTPUT	OWNER
3–9 Aug	Decision gate	Colour scheme approved · sitemap signed off · copy corrections to client	Client + NE
10–23 Aug	Lofi	Wireframes, every Phase 1 screen, CN and EN	Design
24 Aug – 6 Sep	Hifi	Full mockups, design tokens, type scale, component states	Design
7–27 Sep	Build	All pages, CMS wiring, forms, responsive	Development
28 Sep – 4 Oct	UAT	QA, performance, accessibility, client review	NE + client
Early Oct	Demo live	Full marketing site, both languages, forum feed seeded	
Oct – Dec	Forum	Accounts, posting, search, pre-publication moderation	Development

Nothing starts until the colour scheme is approved. That is the client's own condition and it is the single dependency holding the whole schedule.

OUTSTANDING — BLOCKS DESIGN

12 — WHAT WE STILL NEED

Seven things from the client

#	ITEM	CURRENTLY	BLOCKS
1	Colour scheme sign-off	Three directions proposed — Corridor, Institutional, Bridge	Everything
2	English copy corrections	"Cross Board Payment", "Connect us", corridor nav mislabelled "CN-SG corporate"	Lofi
3	Real partnership stories	我们与xx公司的交际始于2000年 — placeholder	Hifi
4	Partner logos	Four corridor cards carry placeholder CYS marks	Hifi
5	Photography	All stock. Any real CYS office, team, or event imagery?	Hifi
6	WhatsApp & WeChat	Deck shows 123456 for both	Build
7	FAQ, terms, privacy	No content. Privacy needs real drafting — the forum collects user content	Build

Design proceeds on placeholders where it must, but every placeholder that survives into Hifi becomes a revision round later.

包容 · 创新 · 启迪 Inclusion, innovation and inspiration.

The three principles are CYS's own, and they are the brief in miniature: open to everyone, technically ahead, and generous with what it knows.

NEXT STEP

Colour scheme approval
