DELIVERABLE	SCOPE	DATE	STATUS
Sitemap — subtask 86eyf6grv	28 routes × 2 locales	2 August 2026	For sign-off

Five branches, 两种语言

Utility, legal and auth

These sit outside the five nav branches. Legal and FAQ are footer-only; auth is header-only. All exist in Phase 1 even though only the forum consumes them.

FOOTER ONLY

常见问题
FAQ

/faq

Listed as a standalone footer item, outside all four columns.
Content outstanding.

FOOTER ONLY

条款和条件
Terms & Conditions

/terms

Content outstanding.

FOOTER ONLY

隐私声明
Privacy Statement

/privacy

Needs real drafting — the forum collects user-generated content and account data.

HEADER — RIGHT

注册
Register

/register

Built in Phase 1 so the header link isn't dead. Gated features arrive in Phase 2.

HEADER — RIGHT

登录
Log in

/login

Email + password, server-side session. Also /logout , /verify , /reset .

UNRESOLVED

华商社群
Chinese community

Appears as a **footer column heading** in the deck but no screen was ever designed for it. Landing page, or just a grouping label?

星威华商论坛 — nine routes

ROUTE	SCREEN	CONTAINS	ACCESS
/forum	论坛首页 List	Approved posts, newest first. Filter by intent · industry · market. Search bar.	Public read
/forum/[slug]	帖子详情 Post detail	Full post, author profile card, structured metadata, comment thread.	Public read
/forum/new	创建帖子 Composer	Title, body, intent, industry, product category, markets. Submits as pending .	Auth
/forum/[slug]/edit	Edit post	Author-only. Editing an approved post returns it to pending .	Author
/forum/search	检索 Search results	PGroonga full-text across CN and EN, plus structured filters.	Public read
/forum/u/[handle]	用户主页 Public profile	Company, industry, markets, approved posts.	Public read
/account/posts	我的帖子 My posts	Author's own posts at every status — pending, approved, rejected with reason.	Auth
/account/profile	我的资料 Profile settings	Display name, company, industry, markets, locale preference.	Auth
/admin/moderation	Moderation queue	Pending posts with classifier verdict, approve / reject with reason, audit log.	Moderator

The composer's structured fields are what make 检索用户/产品/服务 work — the deck's four sample posts are all *"I am X, I want to meet Y"*, so intent and market are data, not prose.

CONFLICT TO RESOLVE BEFORE LOFI

04 — WHERE EACH PAGE APPEARS

Header and footer disagree

HEADER — MEGA MENU

关于我们	公司简介 · 企业发展历史 · 企业文化
中新合作走廊	中新合作伙伴 · 伙伴故事
企业合作	金融机构 · 跨境企业 · 华商论坛
个人用户	— no children —
联系我们	联系方式 · 用户反馈

FOOTER — FOUR COLUMNS

关于星威	公司简介 · 企业发展历史 · 企业文化
华商社群	伙伴故事 · 星威论坛
我们的产品与服务	企业客户 · 个人及家庭服务业务
联系我们	条款和条件 · 隐私声明 · 用户反馈
常见问题	standalone, outside all four columns

Two taxonomies for the same pages

The footer files 伙伴故事 and 星威论坛 under 华商社群 (Chinese community). The header files them under 中新合作走廊 and 企业合作. **Recommendation:** adopt the header taxonomy as canonical — it matches the URL structure — and keep 华商社群 in the footer as a heading only, not a link.

RESOLVED — CANONICAL FOOTER, IF THE RECOMMENDATION IS ACCEPTED

关于星威 公司简介 企业发展历史 企业文化	中新合作走廊 中新合作伙伴 伙伴故事	企业合作 金融机构 跨境企业 华商论坛	个人用户 个人及家庭服务	联系我们 联系方式 · 用户反馈 常见问题 条款和条件 · 隐私声明
--------------------------------	--------------------------	------------------------------	-----------------	---

Header and footer now mirror each other, and both mirror the URL tree. 常见问题 moves inside a column instead of floating outside all four.

Nine modules, top to bottom

01	Hero 首屏	Headline, 1981年启航于新加坡, forum CTA, search field	Sanity
02	Values strip	包容 创新 启迪 — inclusion, innovation, inspiration	Sanity
03	Currency ticker	SGD · CNY/CNH · USD · HKD · AUD · MYR · IDR · THB	Code
04	About block 启航于1981	Company intro → links to /about/history	Sanity
05	Product & service	Three cards → 跨境支付 · 方案咨询 · 华商论坛	Sanity
06	Corridor 中新合作走廊	40+ years stat, four partner cards, CTA → /corridor	Sanity
07	Customisation	Corporate + individual blocks → /business, /individual	Sanity
08	Forum feed 华商论坛	Client ask, absent from the deck. Live posts → /forum. Seeded in the Phase 1 demo.	Supabase
09	Footer	Four columns + FAQ, legal, feedback, language switcher	Code

Fourteen routes, two locales each

ROUTE	PAGE	TEMPLATE	SOURCE OF CONTENT	PHASE
/	首页	Home	Sanity singleton + live forum posts	P1
/about	关于我们	Section index	Sanity singleton	P1
/about/intro	公司简介	Rich text	Sanity — MPI licence & vision copy	P1
/about/history	企业发展历史	Timeline + article	Sanity — 5 milestones + long-form	P1
/about/culture	企业文化	Three-up	Sanity — deck marks this optional	P1
/corridor	中新合作走廊	Section index	Sanity + partner list	P1
/corridor/partners	中新合作伙伴	Logo grid + copy	Sanity — logos outstanding	P1
/corridor/stories	伙伴故事	Card list	Sanity — real stories outstanding	P1
/business/institutions	金融机构	Long-form + CTA	Sanity — 45 MSOs, M-DAQ, DBS/OCBC	P1
/business/cross-border	跨境企业	Long-form + benefits	Sanity — six numbered privileges	P1
/individual	个人用户	Three-up + CTA	Sanity — tuition · shopping · investment	P1
/contact	联系方式	Contact	Sanity — WhatsApp/WeChat outstanding	P1
/contact/enquiry	用户信息填写	Form	Code + Supabase submissions	P1
/contact/feedback	用户反馈	Form	Code + Supabase submissions	P1

Chinese is the default, 英文是镜像

Route shape

`cn.cys.com.sg/zh/about/history`

`cn.cys.com.sg/en/about/history`

Locale is the first path segment. `/` redirects to `/zh`. Route segments stay English in both locales — stable, greppable, and avoids percent-encoded Chinese URLs.

Switcher behaviour

The 中文 | ENG control swaps only the locale segment and preserves the rest of the path plus query. A visitor deep in `/zh/business/institutions` lands on the English equivalent, never the homepage.

SEO

Reciprocal `hreflang` on every page pair plus `x-default` → `/zh`. One sitemap per locale, both referenced from `robots.txt`. Self-canonical per locale — never canonicalise EN to CN.

Parity rule

Every deck screen exists in both languages, so full parity is the assumption: **28 routes total**. If the client wants English reduced, that halves the content workload — but it needs deciding before Lofi, not after.

Three content sources

SANITY — CLIENT EDITS

Marketing copy

Every page body, headline, card, milestone, partner story and contact detail. Bilingual fields on one document, so CN and EN never drift apart.

11 document types. Client edits without a deploy.

SUPABASE — USERS WRITE

Forum & submissions

Posts, comments, profiles, moderation events, enquiry and feedback submissions. All under row-level security; all reads server-side.

Phase 2, except the two Phase 1 forms.

CODE — WE OWN

Chrome & structure

Header, mega menu, footer, language switcher, currency ticker, routing, legal page shells.

Changing these is a deploy, so nav labels should settle at sign-off.

SANITY DOCUMENT TYPES — 11 + 1 SINGLETON

homePage · aboutPage · milestone · culturePage · corridorPage · partner · partnerStory · businessPage · individualPage · contactPage · legalPage · siteSettings

siteSettings carries nav labels, footer groups, contact details, the currency list and social links — one document, edited once, read on every page.

BILINGUAL FIELD PATTERN

Every translatable field is an object with zh and en keys on a **single document** — not two parallel document trees. One editor screen shows both languages side by side, so a copy change can't land in Chinese and silently miss English.

Missing translation falls back to zh and is flagged in Studio, never rendered blank.

REQUIRES A DEPLOY

Adding a route · changing a URL · adding a nav item · new page template · new component · anything in the header, footer, or language switcher chrome. **This is why nav labels and the URL tree should settle at sitemap sign-off** — after Lofi they cost a rebuild, not an edit.

Four decisions in this document

- **Header taxonomy is canonical.** 伙伴故事 sits under 中新合作走廊, 星威论坛 under 企业合作. The footer follows the header, not the reverse.
- **华商社群 becomes a label, not a page.** No screen was ever designed for it. If the client wants a real landing page, that is a new route and a new Lofi.
- **Full CN/EN parity — 28 routes.** Every screen ships in both languages unless the client reduces English scope now.
- **Auth ships in Phase 1, gates nothing until Phase 2.** The header shows 注册 | 登录 on every deck screen; building the routes now avoids a dead link in the demo.

Next: Lofi wireframes, 10–23 August

Every Phase 1 route above, both locales, wireframed against this structure. Sign-off on this sitemap and the colour scheme are the two things holding that start date.
